## About Me

I am a dedicated backend developer with a strong focus on writing clean, maintainable, and efficient code. I specialize in Java-based technologies and designing microservice architectures. In my free time, I am passionate about sports and exploring new technologies, which help me consistently deliver my best in my professional endeavors.

## Experience

2023 -

Java Backend Developer, Liligo

- Designed and developed microservices using Java Spring Boot and implemented REST APIs
- Collaborated closely with the QA team to test and resolve issues promptly
- Created dynamic content processing for SEO pages, improving content quality and workflows
- Managed Kubernetes deployments, ensuring services remained operational and up-to-date
- Worked with project managers and content stakeholders to clarify requirements

2020 - 2022

Linux System Administrator, National Police Headquarters

- Monitored, maintained, and modernized Linux-based systems and applications
- Handled internal communication servers and proxy maintenance, including user access management
- Provided support for high-priority issues and facilitated collaboration with partner companies for large-scale projects

## Additional Skills

- Java
- Spring boot
- Maven
- Gradle
- SQL
- Elasticsearch
- Kubernetes
- Linux
- Python
- bash
- C#
- Git
- Gradle
- HTML
- CSS

## Languages

- Hungarian: native
- English: Intermediate

## Education

2022

Java backend  
GreenFox Academy

- Java
- SQL
- Spring Boot

2021 September -

Computer Engineering  
Óbudai University Neumann János Kar

2020

Linux  
Training360

- Linux Basics I. - II.
- RedHat Enterprise Linux 8
- Bash Programming
- Linux Troubleshooting

2019

Application Operations Training  
Training360

- Networking
- PowerShell
- MSSQL Server
- Azure
- Linux Administration
- Project Work: SQL Queries
